Comrades!

Let me introduce our program for elections to European parliament 2014. We are the party which realizes that European Union is political instrument for banks and monopolies to push their interests through continent.

We also realize that imperialism unites nations not for their good, but for more effective exploitation. As a result we see banks multiplying their profits until living standard falls rapidly. Only thing that rises instead of managers salaries is unemployment and indeptedness of states and families.

In current economical system, we are only slaves for capitalists. We are for liberation of workers from slavery of capitalism.

To fulfil our particular goals on the soil of European parliament, we chose this five points:

NAŠE VZDORUJÚCE TÉMY!

- ✓ **NIE EKONOMICKÉMU KOLONIALIZMU**
No to economical colonialism
- ✓ **ZA SPOLUPRÁCU PRACUJÚCEJ TRIEDY CELEJ EURÓPY**
For cooperation of working class of all Europe!
- ✓ **NIE AMERICKÝM ZÁKLADNIAM A VÄZNICIAM NA ÚZEMÍ EURÓPY**
No to U.S Bases and jails in Europe
- ✓ **ZRUŠENIE EÚ, AKO NÁSTROJA ZÁUJMOV BÁNK A MONOPOLOV**
Cancel the EU as instument of banks and monopolies
- ✓ **ZA SPOLOK, V KTOROM BUDE HOSPODÁRSTVO PATRIŤ ĽUĐOM, ZA SKUTOČNÚ SPOLUPRÁCU NÁRODOV**
For real cooperation of nations! For socialism!

NO TO ECONOMICAL COLONIALISM

Capitalist world know, and always knew countries of rich and poor capitalism. We see countries with many natural resources, inhabited by poor people because all profit goes to „owner“ account. Whole „colonized“ nations are now only cheap producers of great profits for few capitalists. In this system they never saw, and they will never see righteous part of the value they create.

There is no difference between Slovakia and Eastern Europe countries in this case. Until someone may think that our „comeback to Europe“ will make us all rich, we already see that is more probable that people from „West“ will fall to our living standards. European Union do not unite nations because of cooperation and understanding, it unites nations for more effective control, looting and exploiting. In EP we will do everything we can to stop exploitation of the workers, for equal payment for equal job.

We live in the age of global capitalism, imperialism. Capital can travel through whole world in few seconds. Corporations dictates their conditions to governments. National states are becoming vassals of monopolies. We lost all effective instruments to regulate capital, and governments, organizations and individuals are targets of various attacks from capitalists.

Internationalism is a workers instrument which only can overthrow imperialism. Without coordination we can't achieve anything. We may can win some battles, but without coordination, we can't win war. Oligarchs understand it, when we will? Workers have huge power, and it's up to us to organize them in struggle against systém. International solidarity is our main weapon.

Yes, we can is relatively well known slogan from presidential campaign of one of the most famous legally elected terrorists of the world – president Barack Obama. The slogan is really well-taken. Yes, we the Americans can... and we can do everything we want. Not just our country is land of endless opportunities but also the world is a one great opportunity to us. Way to cumulate the capital mostly from foreign countries. Yes we can decide which government is democratic or totalitarian, yes we can have „clues“ about (non-existing) weapons of mass destruction, we can train the „messengers“ of democracy and intervene every time when the interests of USA and international capitalism – who controls them - are in danger. The interests of USA must become the interest of people everywhere in world. And why?

Durring his inauguration speech from january 2013 Barack Obama said these words, quote: *„America will remain the anchor of strong alliances in every corner of the globe. And we will renew those institutions that extend our capacity to manage crisis abroad, for no one has a greater stake in a peaceful world than its most powerful nation. We will support democracy from Asia to Africa, from the Americas to the Middle East, because our interests and our conscience compel us to act on behalf of those who long for freedom.“* How much irony in those words. In the name of freedom and democracy the United States have 757 military bases in the world (in year 2005) and this number is still rising. On 28 february 2014 they opened they opened new military base in Romania which according to them will have crucial role in moving the soldiers from Afghanistan. Of course. It's probably just a coincidence that Romania have common border with Ukraine and Ukraine has common border with Russia, right? The rest of Europe is not in better position too. The presence of democratic militants starts in Norway, trough France, Italy to Turkey. Headquarters of armed forces of US in Europe (USEUCOM) is also creating and improving the concept of deployment on the territory of NATO allies and the more adaptable infrastructure is being created for possibilities of rotating forces and better flexibility for further expansion.

Vzdor – labour party think that the presence of military bases and jails of USA not just on the territory of Europe is unacceptable. Country which has decades of „war tours“ across the world and milions of victims is the only and real threat to democracy and peace of all the nations. Interests of USA are mostly the interests of arms companies which in order to survive have support wars, poverty, hunger and economical slavery. Right now when the world is thrown into the chaos of conflicts and poverty are the stocks of companies like General Dynamics or EADS and others stable and lucrative. Therefore it's up to us to fight against the injustice with our rightful anger. It's up to us to fight against the dictatorship of capitals at all levels – in the streets and in the parliaments! For this struggle we have to recruit all the workers, oppressed and exploited people of Europe! We cannot have something we won't fight for!

European union is the result of international integration of capitalistic economies, which began to develop after the 2nd world war. It was the beginning of connecting and linking of national economies and creating of international economic units. Initiators of these processes were and are particular capitalistic countries and their leaders.

This integration is in fact strongly connected to capitalistic system and it cannot cross the borders of capitalism on its own. In fact it works as a tool to maintain the capitalism and the rule of capitalists.

Integration inside of EU is economical and political – economical enslavement of countries by international capitalism leads to loss of their political sovereignty and cultural speciality. The results of this integration are contradictory – growth of wealth, economical and political power in hands of few capitalists and decline of standards of living of masses in countries subordinated to EU.

Experience shows that in EU is almost impossible to uphold the innovative elements in the sphere of economy, culture or politics. It's because the EU is not ruled by the working class movement but by the corporations and oligarchy. It's not a tool of mutual cooperation of nations. EU is the tool of capitalistic class to enslave nations. This leads to global exploitation. Nationalism, racism, facism grows instead of friendly relations between the nations. Inhabitants of more poorer countries are angry at rich people because of their higher wages, less work or bigger dotations. On the other side the inhabitants of richer countries are angry at desperate workers, who have to leave their less fortunate countries, because they are "stealing their jobs".

This escalating of tension between the employed and unemployed capitalists use to achieve their own class goals which are in contrast with the needs of working people.

European union is from the beginning and in the main project of capitalists to achieve their goals at international level against the goals of whole nations. Organization like this working people cannot improve. It's impossible to do so because it's the tool of capitalists against the working class. They have to destroy it and from its ruins they have to create international league of nations with mission to satisfy the needs of working class. Only in this league, where the production and the natural resources will be in shared ownership of every nation, will be the equality of nations and relations of mutual support granted instead of exploitation which is very common in the EU.

Main goal of Resistance-LP is to overthrow capitalism and replace it by socialist system, in which nations work for themselves and help each other, because it's also in their interest. Socialism is economy of mutual cooperation, not economy of aggressive competition and deceptions. Basic condition is assumption of production resources from capitalists hands and give it to hands of working class. We also want to guarantee right to work for people, righteous rewards, right to education, cultural development, serious pensions etc...

We don't want to declare rights only on paper like current system and politicians do. We want this rights to become real! We want socialism!
